

WRC's new P2000 Roller System

Tough, high traction, none marking.

- Our new dual duro roller System features six core sizes plus special mounts. 18 different diameter covers in 5 standard hardness options compliment rollers up to 12" long.
- Rollers can be cut to length to adapt to your special needs. By casting the bores, keyways and special mounts WRC can provide economic and engineering advantages over rollers that would otherwise be machined or fabricated and then covered.
- WRC's P2000 roller system gives you the flexibility to create custom rollers from standard tooling. Our dual duro roller system features an economical one-way design that eliminates the need to return your rollers for recover.
